MOHAMMED (MIDO) TANTAWY

0498 290 283 ◇ Brisbane, QLD
mtantawy.mido@gmail.com ◇ mido-dev.com

OBJECTIVE

Senior Backend Engineer (Python / Node / Go). I build scalable APIs and data-heavy services on AWS. Recent wins include refactoring legacy Python with a latency drop from ˜90s to 3–10s, modernizing JS to TypeScript, and delivering multi-tenant messaging in Node.js. Comfortable with containers and Kubernetes; pragmatic about performance and delivery.

EDUCATION

AIT University — Bachelor of Information Technology 2019

SKILLS

Languages & Frameworks	Python; Node.js/TypeScript (NestJS); React; Go
Cloud & Infra	AWS; Docker; Kubernetes; Terraform; Pulumi
Data & Messaging	PostgreSQL; Redis; RabbitMQ; CockroachDB
Practices	CI/CD (GitHub, GitLab); unit & integration testing; performance tuning; Agile;

EXPERIENCE

Senior Consulting Developer Jun 2023 – Present
IDEA 11 *Brisbane, QLD*

- Refactored Python 3.6 code paths, reducing critical responses from **90+ seconds to 3–10 seconds**.
- Architected scalable services; Optimized databases handling **million records**.
- Standardized developer environments with **Nix**, cutting new-hire ramp time.
- Delivered secure, scalable cloud solutions using containers; **Kubernetes used in production**.

Backend Developer Feb 2023 – Jun 2023
Docketbook *Brisbane, QLD*

- Modernized legacy Vanilla JS to **TypeScript** (and selectively to Go) for maintainability.
- Designed REST APIs with **NestJS + CockroachDB** for scalability and reliability.
- Built CI/CD and infrastructure automation with **Pulumi**.

Backend Developer 2022 – Feb 2023
CitrusAd *Brisbane, QLD*

- Built RESTful services using **NestJS, PostgreSQL, Redis** with **OKTA** authentication.
- Implemented **Terraform**-based CI/CD for cloud-native deployments.
- Led **Go** microservices for ad placement, delivering **˜30% performance improvement**.

Software Engineer 2020 – 2022
Bandyer *Milan, Italy*

- Built/scaled a multi-tenant SaaS comms platform; replaced Twilio with custom chat using **Node.js, Socket.IO, Redis, RabbitMQ, DynamoDB**.
- Migrated legacy services to **AWS ECS** to improve reliability and scale.
- Delivered robust webhooks/notifications and documentation for cross-team use.
